

Push notifications out of the box (with easy server-side setup)

- They just work.
- All you need is your device's expo push token.

```
let token = await Expo.Notifications.getExpoPushTokenAsync();
```

```
1. terry@Terrys-MBP: ~/LifeWithExpo (zsh)
~/LifeWithExpo
» curl -H "Content-Type: application/json" -X POST https://exp.host/--/api/v2/push/send -d '{
  "to": "ExponentPushToken[xxxxxxxxxxxxxxxxxxxxxxxxxxxx]",
  "title": "hello",
  "body": "world"
}'
```

Super easy to upgrade

- Just follow the upgrade instruction from new SDK release blog post
