You're working just with JS

- You won't write even a single Java/Kotlin or/and Objective-C/Swift line of code

Some parts are not as bad as in React Native

- Font caching

- The splash screen is just an image

```
Expo.Font.loadAsync({
  Montserrat: require('./assets/fonts/Montserrat.ttf'),
  'Montserrat-SemiBold': require('./assets/fontsMontserrat-SemiBold.ttf'),
});
```
